Method of Abatement

- ☐ Encapsulation
☐ Removal & Disposal

Air Clearance Report

☐ **Attached**

The final clearance levels for reoccupancy of the abatement area shall be 0.01 or fewer asbestos fibers per cubic centimeter if determined by Phase Contrast Microscopy analysis (PCM) or 70 or fewer structures per square millimeter if determined by Transmission Electron Microscopy analysis (TEM).

☐ **Not Required** - Specify Reason Below

☐ Area will not be reoccupied

The combined amount of regulated asbestos-containing material involved in the renovation or demolition is less than 260 linear feet on pipes or less than 160 square feet on other facility components or less than 35 cubic feet off facility components.

Comments
or
Additional
Information

I affirm by my signature below that all asbestos-containing materials identified in this permit and as described in the asbestos survey presented as the basis for permit issuance have been removed from this property or properly encapsulated. I further affirm that the asbestos-containing materials were properly disposed of in an Environmental Protection Agency (EPA) approved landfill that accepts asbestos-containing materials.
