Survey Comment #8

You may want to change the development areas along Garst Mill Road near the park to neighborhood conservation. Several of these are now built on as single family houses. The 23 access is terrible because of the curve. I don't know the full definition of "development" for the land use. Low density residential is the only real options. Recycling recommendation should be stronger.

Survey Comment #9

Please extend the mudlick greenway from the park towards HVHS. This would alleviate near miss events between bicycles and cars and provide residents a new life of transport to the HS as well as a fitness path from an area which is heavily dependent of a motor vehicle
